(54) Title: METHOD AND DEVICE FOR IDENTIFYING THE TYPE OF DISCHARGE LAMP

(57) Abstract: A fluorescent lamp is identified by supplying an amplitude-modulated lamp current to the lamp and comparing the amplitude of the voltage peak occurring when the amplitude of the lamp current increases steeply with the amplitudes of the voltage peaks of known lamps that are stored in a memory.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
